1. About this Privacy Policy

This Privacy Policy explains how GreenChoice / Green Connect collects, uses, stores, shares and protects personal information when authorised users access the platform, complete account setup, register a store, manage staff, use product and inventory tools, use POS workflows or contact support.

This Privacy Policy should be read together with the GreenChoice Platform Terms of Service.

The platform is intended for authorised business users only. It is not intended for public consumer accounts.

2. Who is responsible for personal information

For platform account information, onboarding information, support communication, billing/subscription administration and security logs, GreenChoice may act as the responsible party under South African privacy law.

For store business records entered by a store, including staff records, product records, inventory records and POS records, the store may act as the responsible party and GreenChoice may process that information as an operator on behalf of the store, depending on the specific information and arrangement.

Before publication, GreenChoice should insert its registered legal name, Information Officer details and official contact details.

3. Information we collect

The information collected depends on the user role and how the platform is used. The platform may collect the following categories of information:

- Account information: name, surname, email address, phone number, password authentication status, role, invitation status, account status and login details handled through the authentication provider.
- Manager setup information: full name, surname, physical address, South African phone number, terms acceptance status, privacy acceptance status, acceptance timestamps and accepted version numbers.
- Store registration information: store name, store contact email, store phone number, physical store address, city or town, province, postal code, business registration number, licence or permit number and manager/store linking information.
- Staff information: staff names, email addresses, phone numbers, role, account status, store association, staff activity and access changes.
- Business operation data: product names, categories, subcategories, product images, descriptions, prices, stock quantities, inventory movements, POS sale records and audit records entered through the platform.
- Technical and security data: IP address, device/browser information, session information, timestamps, error logs, access logs and audit logs.
- Support communication: emails, messages, issue reports, requests, screenshots or files a user sends to GreenChoice for support.

4. How we collect information

- Directly from users when they complete forms, register a store, create staff accounts, add products, update inventory, use POS workflows or contact support.
- Automatically through authentication systems, platform logs, audit logs, cookies or similar technical tools where used.
- From authorised managers or admins who create invitations or staff accounts for other users.
- From third-party service providers used to host, authenticate, secure, store, back up or support the platform.

5. Why we use information

GreenChoice uses personal information only where there is a lawful and legitimate reason to do so. Purposes may include:

- Creating and managing user accounts and invitations.
- Verifying that manager account setup and store registration have been completed.
- Linking managers, staff and stores correctly.
- Providing product catalogue, inventory, sales workflow, staff management and dashboard features.
- Applying role permissions, route protection, store isolation and access restrictions.
- Recording terms and privacy policy acceptance.
- Providing support, troubleshooting and platform communication.
- Improving security, reliability, performance and error handling.
- Maintaining audit logs and security records.
- Managing subscriptions, payment status and manual access restriction processes.
- Complying with legal obligations or responding to lawful requests.

6. Store data and staff data

Stores are responsible for ensuring that any personal information they enter into the platform is lawful, accurate, necessary and limited to what is needed for store operations.

Managers must not enter unnecessary personal information about customers or third parties into product descriptions, stock notes, sales records or staff fields.

If a store exports or copies data from the platform, that store is responsible for protecting the exported copy.

7. Children and special personal information

The platform is not intended for children or public consumer use. GreenChoice does not intentionally create platform accounts for children.

Users must not enter information about children into the platform unless they have a lawful reason and written authority to do so.

Users should avoid entering special personal information such as health information, biometric information, criminal history, religious beliefs, political opinions or similar sensitive information unless strictly necessary and lawful.

8. Sharing of information

GreenChoice does not sell personal information. GreenChoice may share information only where necessary for the platform or where legally required.

- Service providers: hosting, database, authentication, storage, email, security, backups, support, analytics or billing administration providers.
- Store users: managers and authorised staff may see information required for their role within the same store.
- Legal and safety: regulators, courts, law enforcement, professional advisers or other parties where required by law or necessary to protect rights, safety, security or platform integrity.
- Business changes: if GreenChoice is involved in a merger, sale, restructuring or transfer of business assets, information may be transferred as part of that process subject to appropriate safeguards.

9. Cross-border processing

Some third-party providers may store or process information outside South Africa. GreenChoice should take reasonable steps to use providers and transfer mechanisms that provide appropriate protection for personal information.

By using the platform, users understand that technical service providers may process information in locations outside South Africa where necessary to provide the platform.

10. Security safeguards

GreenChoice aims to use reasonable technical and organisational security measures to protect personal information and platform data.

- Authentication and verified login flows.
- Role-based access control for admins, managers and receptionist users.
- Store-level access isolation.
- Database security rules and access policies where supported.
- Audit logs for important changes and security events.
- Reasonable backup, monitoring and incident-response practices.
- Access restriction features for non-payment, misuse or security concerns.

No system can be guaranteed completely secure. Users must protect their passwords and report suspected unauthorised access quickly.

11. Retention

GreenChoice keeps personal information only for as long as reasonably necessary for the purposes described in this Privacy Policy, unless a longer retention period is required or allowed by law.

Account, billing, audit and security records may be kept after an account is closed where needed for legal, tax, dispute, security or business-record purposes.

Before launch, GreenChoice should define detailed retention periods for inactive stores, closed stores, audit logs, support tickets and backups.

12. Your rights

Subject to South African law and any lawful limitations, a data subject may request access to personal information, correction of inaccurate information, deletion or destruction where appropriate, objection to processing in certain cases, and information about whether GreenChoice holds personal information about them.

Requests can be sent to the contact details in this Privacy Policy. GreenChoice may need to verify identity before acting on a request.

Some requests may need to be handled by the relevant store where the store is the responsible party for the information.

13. Cookies and technical data

The platform may use cookies or similar technical tools for login sessions, security, preferences, performance, analytics or reliability. Essential cookies are needed for the platform to work properly.

If GreenChoice later adds non-essential analytics or marketing cookies, it should update this Privacy Policy and, where required, provide appropriate notice or choice.

14. Direct communications

GreenChoice may send service messages about account setup, invitations, security, billing, access restriction, support, maintenance and important platform updates.

GreenChoice should only send marketing messages where lawful and should provide an opt-out method where required.

15. Changes to this Privacy Policy

GreenChoice may update this Privacy Policy from time to time. The platform should track the accepted privacy policy version for each manager account.

Where a change is material, GreenChoice should provide reasonable notice or request renewed acceptance before continued use where appropriate.

16. Contact and complaints

Platform privacy contact: mthokozisiskhosana731@gmail.com

Phone: 0662105034

Information Officer details to insert before publication: [Name, title, email address and physical/business address].

A data subject may also contact the Information Regulator South Africa if they believe their personal information rights have been interfered with. Confirm the current regulator contact details before publication.

Acceptance record

The platform should record acceptance electronically when a manager ticks the checkbox and submits the relevant setup form. Suggested database fields are included below for implementation tracking.

Field	Purpose
accepted	Confirms the user accepted this document.
accepted_at	Stores the date and time of acceptance.
document_version	Stores the accepted version number, e.g. 1.0.
user_id	Links the acceptance to the authenticated manager account.
ip_address / user_agent	Optional security record for audit purposes, where lawful and necessary.

Drafting note: Before publication, confirm the official responsible party/operator structure, Information Officer, retention schedule, cookie/analytics choices, hosting region and subprocessors.
