1. About these Terms

These Platform Terms of Service govern access to and use of GreenChoice / Green Connect, including the manager dashboard, receptionist dashboard, admin-created invitations, store registration, staff access, product catalogue, inventory, sales workflow, audit logging and related software features.

By creating an account, accepting an invitation, ticking the acceptance checkbox, accessing the platform or using the services, the authorised user agrees to these Terms on behalf of themselves and, where applicable, the store or business they represent.

If a user does not agree with these Terms, the user must not use the platform.

2. Platform role

GreenChoice is a software platform for internal store operations. The platform helps authorised businesses manage staff, product information, inventory, access status and point-of-sale workflow records.

GreenChoice is not a cannabis seller, marketplace, delivery service, payment processor, medical adviser, legal adviser, pharmacy, dispensary, cultivation operator or licensing authority.

The platform does not itself authorise any store to trade, sell, distribute, cultivate, prescribe, market or deal in any regulated product. Each store remains responsible for deciding whether and how it may lawfully operate.

3. Eligibility and authorised users

The platform is intended only for authorised business users who have been invited or approved to use GreenChoice for store-operation purposes.

A manager must have authority to register the store, provide business details and manage staff access for that store.

The platform is not intended for children, casual consumers or members of the public. Consumer accounts are not part of the platform.

4. Invitation, login and account security

Manager accounts are created through an invitation flow. After receiving an invitation link, the manager sets their password through the authentication provider and then logs in to complete account and store setup.

Users must keep login details confidential, use strong passwords and prevent unauthorised access to their accounts.

The store is responsible for staff actions taken through staff accounts linked to that store, except where the action is caused by GreenChoice negligence or platform compromise.

The platform may use email verification, authentication sessions, audit logs and role-based access control to protect accounts.

5. Manager and store responsibilities

The manager and store are responsible for ensuring that all information submitted to the platform is complete, accurate and up to date.

This includes account details, store contact details, physical address, business registration information, licence or permit information, staff details, product details, prices, inventory quantities and sales records entered into the system.

The manager is responsible for managing staff accounts, removing access when staff leave, and ensuring staff use the platform only for authorised store duties.

6. Store compliance and regulated goods

Each store is solely responsible for its own compliance with applicable laws, licences, permits, municipal rules, tax obligations, age restrictions, record-keeping duties and any other regulatory duties that apply to its business.

GreenChoice does not verify that any store is legally permitted to sell, stock, advertise, cultivate, transport or handle any regulated product. Any licence or permit number entered into the platform is stored for business-record purposes only and does not create approval by GreenChoice.

The store must not use the platform to support unlawful activity, false licence claims, unauthorised dealing, unsafe practices, fraud or transactions involving persons who are not legally permitted to be involved.

Product descriptions entered by managers must not make unlawful medical, health, cure, treatment, guaranteed-effect or misleading claims.

7. Subscription, payment and access restriction

GreenChoice may offer the platform through a trial, subscription, manual monthly payment arrangement or other agreed commercial arrangement.

If a store fails to pay agreed fees, breaches these Terms, or creates a serious security/compliance risk, GreenChoice may restrict access to the platform.

Access restriction is intended to block use of the platform. Access restriction should not automatically delete the store data, product records, inventory history, staff records or sales records stored for that store.

Where reasonably possible, GreenChoice will provide notice before non-payment restriction, but immediate restriction may be applied for fraud, security risk, unlawful use or serious misuse.

8. Store data and user content

The store owns the business data it enters into the platform, subject to GreenChoice retaining ownership of the platform software, design, branding, workflows and system infrastructure.

The store grants GreenChoice the limited right to host, process, store, back up, display and transmit store data only as necessary to provide, secure, support and improve the platform.

The store is responsible for the accuracy and legality of product images, product names, descriptions, prices, inventory quantities, staff data and other content entered by its users.

GreenChoice may keep audit logs, security records, access records and technical logs where necessary for platform security, troubleshooting, accountability and legal compliance.

9. Acceptable use

- Do not use the platform for unlawful sales, fraudulent activity, false licensing information, unauthorised access, data scraping, hacking, malware, spam, harassment or abuse.

- Do not attempt to bypass role permissions, restriction screens, subscription controls, authentication, audit logs or store isolation controls.
- Do not upload content that infringes intellectual property rights, contains harmful code, or is misleading, unlawful or unsafe.
- Do not share accounts between staff members. Each staff member should use their own authorised account where staff accounts are enabled.
- Do not enter unnecessary sensitive personal information, especially information about children, health, biometrics, criminal history or private consumer details unless lawful and strictly necessary.

10. Staff roles and audit logs

The platform may support different roles, including admin, manager and receptionist. Role permissions are designed to separate platform control, store management and POS workflow access.

Managers may be able to create, activate, deactivate, delete or reset staff accounts depending on the final platform configuration.

The platform may record audit logs for important actions, including login events, staff changes, product changes, inventory movements, POS transactions and account restrictions.

11. Third-party services

GreenChoice may rely on third-party providers for authentication, database hosting, email delivery, storage, backups, analytics, security, support, payment administration or other technical services.

GreenChoice is not responsible for outages, failures or security incidents caused by third-party providers beyond GreenChoice reasonable control, but GreenChoice will take reasonable steps to select and configure providers appropriately.

12. Availability, maintenance and support

GreenChoice aims to provide a reliable platform, but does not guarantee uninterrupted or error-free availability.

The platform may be unavailable due to maintenance, updates, security work, internet failures, hosting provider issues, power outages or events beyond reasonable control.

GreenChoice may update, improve, remove or change features where reasonably necessary for security, reliability, legal compliance, performance or product development.

13. Privacy and security

Use of personal information is governed by the GreenChoice Privacy Policy, which forms part of the onboarding acceptance process.

GreenChoice will use reasonable technical and organisational measures to protect platform data, including role-based access controls, authentication, database security rules and audit records where appropriate.

No software system can be guaranteed to be completely secure. Users must report suspected unauthorised access, data errors or security concerns as soon as reasonably possible.

14. Intellectual property

GreenChoice owns or is licensed to use the platform software, user interface, branding, workflows, documentation, designs, names, logos, code and system architecture.

Users may not copy, reverse engineer, resell, sublicense, reproduce, scrape, clone or create derivative software from the platform except where expressly allowed in writing.

The store remains responsible for ensuring that any product images, logos, descriptions and other content it uploads may lawfully be used.

15. Suspension and termination

GreenChoice may suspend or terminate access if a user or store breaches these Terms, fails to pay agreed fees, misuses the platform, creates a security risk, provides false information or uses the platform for unlawful activity.

A store may request closure of its account, subject to payment of outstanding fees and any reasonable data export, retention or legal compliance process.

Termination does not remove obligations that should reasonably survive termination, including payment obligations, confidentiality, intellectual property restrictions, limitations of liability, data retention and dispute terms.

16. Disclaimers and limitation of liability

The platform is provided as store-operation software and is not a guarantee of legal compliance, business success, uninterrupted trading, inventory accuracy or regulatory approval.

GreenChoice is not responsible for losses caused by incorrect store data, staff mistakes, unlawful store activity, inadequate store procedures, customer disputes, product quality, tax issues, regulatory action, third-party downtime or events outside GreenChoice reasonable control.

To the maximum extent allowed by South African law, GreenChoice liability for claims relating to the platform is limited to the fees paid by the relevant store for the platform during the three months before the event giving rise to the claim, unless a different written agreement applies.

Nothing in these Terms excludes liability that cannot lawfully be excluded.

17. Changes to these Terms

GreenChoice may update these Terms from time to time. The platform should track the accepted version number for each manager account.

Where changes are material, GreenChoice should provide reasonable notice or require renewed acceptance before continued use.

18. Governing law and disputes

These Terms are governed by the laws of the Republic of South Africa.

The parties should first try to resolve disputes through good-faith discussion. If a dispute cannot be resolved informally, it may be referred to a court or other dispute process with jurisdiction in South Africa, unless a separate written agreement provides otherwise.

19. Contact details

Platform contact: mthokozisiskhosana731@gmail.com

Phone: 0662105034

Legal/business details to insert before publication: registered legal name, company registration number, registered address, Information Officer details and support email if different from the above.

Acceptance record

The platform should record acceptance electronically when a manager ticks the checkbox and submits the relevant setup form. Suggested database fields are included below for implementation tracking.

Field	Purpose
accepted	Confirms the user accepted this document.
accepted_at	Stores the date and time of acceptance.
document_version	Stores the accepted version number, e.g. 1.0.
user_id	Links the acceptance to the authenticated manager account.
ip_address / user_agent	Optional security record for audit purposes, where lawful and necessary.

Drafting note: Before publication, confirm the final business name, registered address, billing process, data retention period, complaint process and legal review status.
